**Independent design and management partner  
From pre-planning to construction**

It can be a challenge to find reliable design partners for low-CAPEX projects, with many of the Tier 1 delivery partners only operating via high-value frameworks and smaller providers interested in limited aspects of the project.

At Capital Project Managers Ltd, we can take away this challenge and are able to provide comprehensive support throughout the design, install, and commissioning process.

Our focus on transparent communication and close collaboration enables us to integrate seamlessly with our clients and delivery partners. Whether it is early-stage stakeholder management, consenting support, technical due-diligence of design partners, or day-day cost and progress oversight; we are on hand to help.

### **Project Management & Consultancy**

- Feasibility & Business Plan Development
- Project Strategy
- Project Management
- Project Programming & Administration
- Stakeholder Engagement
